

Name - Kritika Gaur

Course - BCA '6'

Roll no - 17 (1121075)

Subject - Information
Security

Paper Code - TBC-601

Date - 15/06/21

1) Find any 3 security aspects of Google account.

→ Three security aspects of the Google account:

Step 1:

Go to security checkup to get personalized security recommendations for your Google Account, including:

1. Add or Update Account Recovery Options:

Your recovery phone number and email address are powerful security tools. This contact info can be used to help:

- Block someone from using your account without your permission
- Alert you if there's suspicious activity on your account
- Recover your account if you're ever locked out.

2. Step Verification helps prevent a hacker from getting into your account, even if they steal your password. To avoid common phishing techniques associated with text message codes, choose a stronger second verification step:

Security Keys (Most secure verification step)

Google Prompts (Most secure than text message codes)

Step 2 :

Update your Software

If your browser, operating system, or apps are out-of-date the software might not be safe from hacked. Keep your software updated to help protect your account.

* Update your browser

Make sure you're using the latest version of your browser.

Learn how to update Google Chrome.

Update your Operating System. Make sure you're using the latest version of the operating system on your device or computer.

Update Android Devices.

Update chrome books

Learn how to update your Chromebook's operating system.

Step 3 :

Use Unique Strong Password. It's risky to use the same password on multiple sites. If your password for one site is hacked, it could be used to get into your account for multiple sites.

Make sure to create a strong, unique password.
